DETAILED ACTION

This communication is in response to the Applicants' response dated 5/17/2006.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Regarding claims 1, 15-17, the claims lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material *per se*.

Response to Arguments

Examiner contacted the Applicants' Representative on September 14 and September 28, 2006 to request for an amendment solving the 101 issues of the independent claims in order to put the case in the condition for allowance. However, the Applicants do not have the result for the issue yet.
